

Now that you've found the perfect ring, make sure it fits you perfectly!

Use Blank's convenient ring sizer to determine your correct ring size.

Remember, your ring size will vary depending on time of day, weather, illness, etc. To determine your most accurate ring size, the best option is to get your finger professionally measured by a jeweler, however, our ring sizer should provide an accurate assessment in the meantime!

Follow these simple steps to use our ring sizer:

- Cut the ring sizer out of from the paper, making sure to cut along the dotted line to form a slot.
- Pull the tab through the slot, making sure the numbers are facing outward.
- Insert your finger through the formed circle, and pull the tab so the ring sizer is snugly fit to your finger.
- Your ring size will be displayed on the sizing chart.
